X-VAC[®]
**HYDRO
EXCAVATORS**

THE MOST POWERFUL **HYDRO EXCAVATORS** ON EARTH

DO MORE WITH POWER & PAYLOAD

- Powerful water and vacuum systems tackle the toughest jobs fast
- Go further and deeper in less time and with less effort with X-Vac's below grade boom design
- Water and debris capacities to fit a wide range of needs

DEFEAT DOWNTIME

- Unloads fast, so you can get back to work
- Optional winterized water systems are freeze-resistant even in the coldest temperatures

PROTECT YOUR PERSONNEL

- Unique safety features wherever your team touches the truck: on the job, on the road, and during maintenance

POWER AND CONTROL

- Cut through tough soil, with a 20 GPM and up to 4,000 PSI water system
- Vacuum away debris as fast as it's created, with an industry-leading 27" HG and 5,775 CFM blower option
- Cut through even the most difficult or frozen soils with an optional 700K BTU diesel-fired boiler system
- Avoid downtime with standard vacuum break that disperses tube clogs

DIG DEEPER

- Expand your operating space with booms that extend up to 25' from the truck centerline
- Excavate in a wider area using true 360° boom rotation
- Go deeper with fewer setups, with a boom design that operates down 15° below grade

BUILT TO LAST

- Precision-welded minimum 1/4" A-36 steel debris tanks include a limited lifetime warranty
- Corrosion-proof water tanks constructed of thick 3/8" rotomolded polyethylene, with a limited lifetime warranty
- Commercially-available controls are easy to operate, durable, with proven components

FAST DEBRIS OFFLOAD

- Optional sludge pump quickly empties liquids
- Easy-access tilting debris tank with a full-width full-opening 67" hydraulic door
- Available vibrator shakes loose even stubborn debris

SAFETY IS STANDARD

- Dual E-stops on wireless & curbside controls for fast response to emergency conditions
- Standard boom out-of-stow alarm helps prevent on-road overhead collisions
- Debris tank and tank lid prop rods protect technicians by locking open during maintenance
